

LISTING OF DIVISIONS & WHOLE PLANTS
OCTOBER 2017
AUSTRALIAN CUSTOMERS ONLY

***DEN SPECIOSUM* SPECIES & INTERVARIETAL DIVISIONS**
Cedarvale Orchids is closing - and this is another release of our
breeding and stock plants
Number of divisions will be determined when dividing plants
Some plants are established in pots
(refer notes 1-6 below)
Orders will be satisfied on a first come/first served basis.
The listing will be updated regularly on our website:
www.cedarvaleorchids.com
DIVISIONS MUST BE PRE-PAID PRIOR TO DESPATCH

Plant Ref. No.	Description	Selling Price (each)
3		\$
4		\$
5	<i>D speciosum</i> var (<i>speciosum</i> 'Goldilocks' x <i>curvicaule</i> 'Daylight Moon') - 4-cane division	SOLD \$150.00
6	'Goldilocks' is a selfing of 'Windermere' and 'Daylight Moon' is the most awarded <i>Den speciosum</i> in Australia - crossing these two has resulted in some exceptional bench quality plants. This is one of them. PICTURE OF FLOWERS AVAILABLE	POTTED
7	<i>D speciosum</i> var <i>speciosum</i> 'Bevan' x 'George's River Special' - 3 divisions available	\$160.00
8	We have come to realise that 'Bevan' as a parent plant produces some remarkably good offspring. Married here with 'George's River Special' gives added texture to the segment width. We think so much of the plants from this cross that we have used some in our breeding program. PICTURE OF FLOWERS AVAILABLE	POTTED
9	<i>D speciosum</i> var <i>curvicaule</i> 'Misty Mtn' HCC/ANOS x 'Daylight Moon' FCC/AOC	\$300.00
10	This crossing produces a similar result to the other 'Daylight Moon' crosses but has a tendency to produce larger flowers with heavier texture and wider segments. Considered by some to be the better of the variety <i>curvicaule</i> crosses and looking at the flowers you could understand this thinking. PICTURE OF FLOWERS AVAILABLE	POTTED
11	<i>D speciosum</i> var <i>speciosum</i> 'Windermere' x 'Heather' AM/ANOS - 1 division available	\$160.00
12	'Windermere' has been used extensively in breeding by most nurseries. This much sought after clone consistently produces beautiful displays of robust broad-segmented yellow flowers. Mated with 'Heather' which is an AM awarded plant to produce some excellent bench quality type flowers. PICTURE OF FLOWERS AVAILABLE	POTTED

	A	B	C
13	S344/12	<i>D speciosum</i> var <i>curvicaule</i> 'Palmerston' x 'Jacqueline' - 1 division available	\$135.00 SOLD
14		Again a top result in var <i>curvicaule</i> breeding. - 'Palmerston' is a highly awarded var <i>curvicaule</i> with all the traits of an AM plant. 'Jacqueline', when mated with 'Daylight Moon' produced some of the best bench quality plants we have bred and the results of this mating should be as good as if not better than these. PICTURES OF FLOWERS AVAILABLE	POTTED
15	S348/12	<i>D speciosum</i> var <i>speciosum</i> 'Impressive' - 1 x 4-cane division	\$330.00
16		'Impressive' is a selfing of 'Dreamtime' which is described as having 'stout canes producing medium spikes of very large white flowers possibly one of the largest for the type'. If you can imagine something better than this than you can imagine 'Impressive' - at first flowering it produced a spike 920mm long containing 114 flowers the base flower being 80mm tall by 55mm wide which when first seen was exclaimed 'Wow!! that's impressive'. A must for the serious collector. PICTURE OF FLOWERS AVAILABLE	POTTED
17	S356/11	<i>D speciosum</i> var <i>curvicaule</i> 'Blake' x 'Misty Mtn'	\$50.00 SOLD
18		This plant produces top quality show bench flowers with exceptionally heavy textured segments. Similar in colour and presentation to the best of the var <i>curvicaule</i> . REFER TO S311/11 FOR PICTURE OF SIMILAR FLOWERS	
19	S413/15	<i>D speciosum</i> var <i>grandiflorum</i> 'QOS91' x self - 1 x 4-cane divisions available	\$100.00 SOLD
20	S413/15	<i>D speciosum</i> var <i>grandiflorum</i> 'QOS91' x self - 1 x 3-cane division available	\$55.00 SOLD
21		Another great var <i>grandiflorum</i> , grand in all aspects of plant size, flower size and length of spike. Similar to the parent producing beautifully presented sprays of rich gold flowers. PICTURE OF FLOWERS AVAILABLE	POTTED
22	S478/17	<i>D speciosum</i> var <i>capricornicum</i> 'Carnarvon C' - 1 division available	\$75.00
23		Typical Carnarvon clone collected in the 1980's producing rich beetroot coloured new growths and pale lemon flowers. NO PICTURES OF FLOWERS AVAILABLE	POTTED
24	S479/17	<i>D speciosum</i> var <i>curvicaule</i> 'Ivory Star' x 'Daylight Moon'	\$115.00 SOLD
25		An exceptionally good form of var <i>curvicaule</i> . Expect mustard coloured flowers with large segments and heavy texture on medium upright/arching spikes - definite bench quality. PICTURE OF SIMILAR FLOWERS AVAILABLE - REFER S299/11 and S247/09	
26	S480/17	<i>D speciosum</i> var <i>grandiflorum</i> 'Rhonda's Gold' x 'Michelle' - 4-cane division	\$100.00 SOLD
27	S480/17	<i>D speciosum</i> var <i>grandiflorum</i> 'Rhonda's Gold' x 'Michelle' - 4-cane division	\$75.00 SOLD

	A	B	C
28		I put this in the same category as 'Jelita' - one of the all time best var <i>grandiflorum</i> available. 'Rhonda's Gold' was bred by Ted Gregory but used 'Larcom Gold' instead of 'Mt Larcom Gold' in conjunction with 'Kroombit Gold'. 'Michelle' is one of the strongest growing var <i>grandiflorum</i> I have yet seen - grand in all aspects, length of spike, flower size and plant growth. PICTURE OF PARENT FLOWERS AVAILABLE - REFER S153/07 ('Rhonda's Gold') and S071/05 ('Michelle')	POTTED
29	Hybrid	<i>D (Ivory x speciosum) x speciosum var curvicaule</i> 'Apricot Surprise' = <i>D</i> Greta Gold '#2' - 1 division available	SOLD \$350.00
30		This cross was made by Don Cruickshanks using the same <i>Den speciosum</i> that was used in the <i>Den</i> Greta Snow breeding. The result is brilliant orange/gold flowers very <i>speciosum</i> -like in presentation and shape. Definite show bench quality and I believe, potential award quality. PICTURE OF FLOWERS AVAILABLE	POTTED
31	WHOLE PLANTS (ESTABLISHED)		
32	S125/06	<i>D speciosum var curvicaule</i> 'Daylight Moon' x 'Jacqueline' - 'Jaq's Moon' (whole plant)	SOLD \$250.00
33		An exceptionally good form of var <i>curvicaule</i> bred with 'Daylight Moon' and 'Jacqueline', in my mind in the same class as 'Daylight Moon' itself. Champion species of Kabi Show 2009. PICTURE OF FLOWERS AVAILABLE	
34	S330/11	<i>D speciosum var (speciosum 'Windermere' x curvicaule 'Palmerston')</i> (whole plant)	SOLD \$120.00
35		This plant is from two of the top breeders in the species and a number of winners have come from this cross. 'Windermere' adds dimension to the 'Palmerston' flowers resulting in perfect presentation of yellow show bench quality spikes. PICTURE OF SIMILAR FLOWERS AVAILABLE - REFER S426/15	
36	S388/14	<i>D speciosum var curvicaule</i> 'Bee Creek' x 'Daylight Moon' (whole plant)	SOLD \$250.00
37		This cross has produced a number of awarded plants and this clone shows definite show championship potential. Very similar in presentation and habit to 'Daylight Moon' itself. Most plants from this cross are almost identical showing very little variation. PICTURES OF FLOWERS AVAILABLE	
38			
39	Note 1	All divisions will have a minimum of 5-6 canes and will include forward canes which will be sent bare root unless noted as established/whole plants in which case they will be sent potted. Should potting of bare root divisions be requested an extra charge of \$10 will apply. Pictures of flowers are available on the website (where available).	
40	Note 2	Number of divisions available from each plant will be determined when dividing takes place. All orders will be taken on a first come basis (either by email or by phone)	
41	Note 3	Freight/packaging/handling will incur an extra cost depending upon size/weight of package.	

	A	B	C
42	Note 4	We do not accept orders to Tasmania or Western Australia due to their import requirements.	
43	Note 6	This divisions listing and pricing applies to <u>Australian</u> customers only.
